

SCAM ALERT

BEWARE! FAPTURBO Clones attack!

Cloned Expert Advisor Report

by Mark Larsen, www.Forex-Systems-Reviews.com

Recently Fapturbo.com robot became so popular and profitable that every scammer dreams of cloning it. There was a huge number of scam clones created recently. Most of them are just mere scams - when the vendor has stolen fapturbo codes, decompiled them, renamed and resell under the new name. The important difference is — all these scams have very high price (around 997 usd) and No-Refund policy. Beware!

As I know Fapturbo has a strong anti-fraud Abuse Team that applies serious legal actions against these scammers and already shut down most of them.

Some of the clones are illegal modifications or just pure legal clones when the programmer takes the same idea of asian-market scalping on EURGBP and use it with a new algorithm.

Today I would like to review some of them to warn you about the scammers' tricks.

Scam clones (identical code or minor modifications) — BEWARE:

1. **RemExpert** (Vendor: buyexpertadvisor)

The Ea code was analyzed by Casey from bestforexea site. He has found out that RemExpert code is identical to fapturbo. «I have shown that REMExpert is using FAPTurbo as it's base EA.» They sell this scam for \$950.

Large parts of the code look totally identical.

```
int init() {
    double ld_0;
    string ls_8;
    gi_812 = TRUE;
    if (!PrintLogOnChart) Comment("");
    if (!IsDllsAllowed()) {
        Comment("Warning: Set Parameter \"AllowDLL Imports\"
        gi_804 = FALSE;
        return (0);
    }
    gi_804 = TRUE;
    gs_920 = Symbol();
    if (Digits < 4) {
        gd_872 = 0.01;
        gi_832 = 2;
    } else {
        gd_872 = 0.0001;
        gi_832 = 4;
    }
    gd_880 = MarketInfo(gs_920, MODE_MAXLOT);
    gd_888 = MarketInfo(gs_920, MODE_MINLOT);
    gd_896 = MarketInfo(gs_920, MODE_LOTSTEP);
    gd_904 = MarketInfo(gs_920, MODE_MARGINREQUIRED) * gd_
    if (TradeMicroLots) gi_824 = 2;
    else gi_824 = 1;
    if (!UseScalperStrategy) {
        if (StringSubstr(gs_920, 0, 6) != "EURUSD" || Pezio
        Alert("Use Fapturbo system only on EURUSD M1.");
        Print("Use Fapturbo system only on EURUSD M1.");
        Comment("Error: Wrong TimeFrame or Currency Pair
        gi_804 = FALSE;
        return (0);
    }
    gi_804 = TRUE;
    if (FapTurbo_StartWorkTimeHour < 0 || FapTurbo_Start
    if (FapTurbo_StartWorkTimeMin < 0 || FapTurbo_Start

int init() {
    gi_572 = TRUE;
    if (!gi_128) Comment("");
    if (!IsDllsAllowed()) {
        Comment("Attention: Set Parameter \"AllowDLL Imports\" ON i
        gi_564 = FALSE;
        return (0);
    }
    gi_564 = TRUE;
    gs_716 = Symbol();
    if (Digits < 4) {
        gd_580 = 0.01;
        gi_864 = 2;
    } else {
        gd_580 = 0.0001;
        gi_864 = 4;
    }
    gd_588 = MarketInfo(gs_716, MODE_MAXLOT);
    gd_596 = MarketInfo(gs_716, MODE_MINLOT);
    gd_604 = MarketInfo(gs_716, MODE_LOTSTEP);
    gd_612 = MarketInfo(gs_716, MODE_MARGINREQUIRED) * gd_604;
    gi_564 = TRUE;
    string ls_0 = StringSubstr(gs_716, 0, 6);
    if ((ls_0 != "EURGBP" && ls_0 != "EURCHF" && ls_0 != "GBPCHF"
        Alert("Use RemExpert system on M15 EURCHF, EURGPB, GBPCHF,
        Print("Use RemExpert system on M15 EURCHF, EURGPB, GBPCHF,
        Comment("Use RemExpert system on M15 EURCHF, EURGPB, GBPCHF
        gi_564 = FALSE;
        return (0);
    }
    gi_564 = TRUE;
    if (ls_0 == "EURCHF") {
        gi_492 = 21;
        gi_496 = 23;
        gi_500 = 50;
        gi_784 = gi_192;
```

Conclusion: RemExpert is a SCAM! Beware.

2. Automated Forex Grail

As I know Fapturbo abuse team has compared both codes and found them to be identical. The programmer of the Forex Grail has stolen fapturbo codes, renamed several functions, removed the long-term strategy however the main strategy remains the same. After the applying legal actions the sales of this EA were stopped.

Take a look - All the functions are identical. The programmer only changed the names of the variables and functions.

3. FAPTURBO ORIGINAL FILTER:

```

bool Scalper_CheckTrendFilter()
{
    if(Scalper_HowMuchBars <= 0) return(false);
    for(int i=0; i<=Scalper_MissBars; i++)
    {
        double curr_ma =
        NormalizeDouble(iMA(NULL,0,Scalper_MA_Period,0,Scalper_MA_Method,
        Scalper_MA_Price,i),digits);
        double prev_ma =
        NormalizeDouble(iMA(NULL,0,Scalper_MA_Period,0,Scalper_MA_Method,
        Scalper_MA_Price,i+Scalper_HowMuchBars),digits);
        double percent = MathAbs(curr_ma - prev_ma)*100/prev_ma;
        if(percent > Scalper_MaxPercentMove) break;
    }
    if(i > Scalper_MissBars) return(false);
    if(WriteDebugLog)
    {
        Print("Today market is in risky conditions. Trading is forbidden
        by the filter TrendFilter.");
    }
}

```

FILTER "CheckTrendFilter": In AUTOGRAL:

```

bool Filtrar()
{
    double ld_0;
    double ld_8;
    double ld_16;
    for (int li_24 = 0; li_24 <= 3; li_24++)
    {
        ld_0 = NormalizeDouble(iMA(NULL, 0, 5, 0, MODE_SMA, PRICE_CLOSE,
        li_24), gi_212);
        ld_8 = NormalizeDouble(iMA(NULL, 0, 5, 0, MODE_SMA, PRICE_CLOSE,
        li_24 + 4), gi_212);
        ld_16 = 100.0 * MathAbs(ld_0 - ld_8) / ld_8;
        if (ld_16 > 0.3) break;
    }
    if (li_24 > 3) return (FALSE);
    return (TRUE);
}

```

3. EA BOSS (Vendor: Ermek Bekbolatov)

This is a pure clone of fapturbo scalper for EURGBP and other pairs. The scammer is selling it for **\$699 with no refund policy**. No wonder why. The Ea code was analyzed by Casey. Take a look on the code comparison:

EA BOSS DEMO version~.mq4	FapTurbo23~.mq4
<pre> SetOrderLevels(); if (Ask - Bid <= gd_772) { if (DayOfWeek() != 0) { if (!gi_164) if (DayOfWeek() == 5) return; if (DayOfWeek() == 1 && Hour() < gi_700) ret if (Scalper_IsTradeTime()) { if (gi_152 > 0) if (Scalper_IsRelaxHours()) return; if (gi_156) if (Scalper_CheckSimpleHeightFilter()) if (gi_160) if (Scalper_CheckTrendFilter()) return if (gi_168 != 0) { if (Scalper_HaveTrade()) { if (!(gi_204)) return; Print("Already have one trade insid return; } } } HideTestIndicators(TRUE); ld_0 = iRSI(NULL, PERIOD_M15, gi_476, PRI ld_8 = iRSI(NULL, PERIOD_M1, gi_484, PRIC ld_16 = iMA(NULL, PERIOD_M15, gi_472, 0, if (fun2(Ask + 0.0002, ExistPosition(), 1 if (gi_592) { if (!(gi_172)) li_24 = 0; else { ld_28 = iMA(NULL, PERIOD_M15, gi if (Close[0] <= ld_28) li_24++; } } if (li_24 == 0) { OpenPosition(OP_BUY, gi_628, gi_ gi_592 = FALSE; gi_596 = TRUE; } } } } </pre>	<pre> if (gi_748 == 0) { if (Ask - Bid <= gd_996) { if (DayOfWeek() != 0) { if (!Scalper_TradeFriday) if (DayOfWeek() == 5) return; if (DayOfWeek() == 1 && Hour() < gi_924) return; if (Scalper_IsTradeTime()) { if (Scalper_RelaxHours > 0) if (Scalper_IsRelaxHours()) return; if (Scalper_SimpleHeightFilter) if (Scalper_CheckSimpleHeightFilter()) return; if (Scalper_TrendFilter) if (Scalper_CheckTrendFilter()) return; if (Scalper_OneTrade != 0) { if (Scalper_HaveTrade()) { if (!(WriteDebugLog)) return; Print("Already have one trade inside this in return; } } } } HideTestIndicators(TRUE); ld_0 = iRSI(NULL, 0, gi_680, PRICE_CLOSE, 0); ld_8 = iRSI(NULL, PERIOD_M1, gi_688, PRICE_CLOSE, ld_16 = iMA(NULL, 0, gi_676, 0, MODE_SMA, PRICE_ME HideTestIndicators(FALSE); if (fun2(Ask + 0.0002, ExistPosition(), ld_0, ld_8 if (gi_816) { if (!Scalper_UseFilterMA) li_24 = 0; else { ld_28 = iMA(NULL, 0, Scalper_PeriodFilter if (Close[0] <= ld_28) li_24++; } } if (li_24 == 0) { OpenPosition(OP_BUY, gi_852, gi_856); gi_816 = FALSE; gi_820 = TRUE; } } } } </pre>

4. **Destiny EA (Vendor: Rich Henry)**

Rich Henry is a well known scammer, creator of Conquest System (Protraderforex.com) and DestinyForex.com

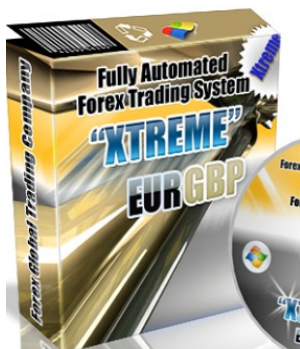

Few month ago he came up with so called «free new Destiny 3.32» that is given to the clients who open brokerage account using his affiliate link.

After the investigation we have found out that Destiny 3.32-33 is a stolen fapturbo clone. Now wonder it works so good. Beware!

Legal Clones (Not scams)

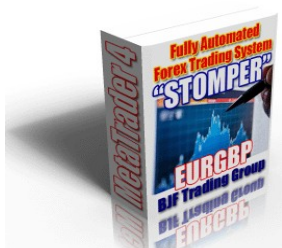

These Expert Advisors are not scams however they use the similar idea of scalping EURGBP M15 during the asian session so I call them «legal clones». They use different algorithm however the idea is the same.

1. **XtremeEURGBP (Vendor fxgtc)**

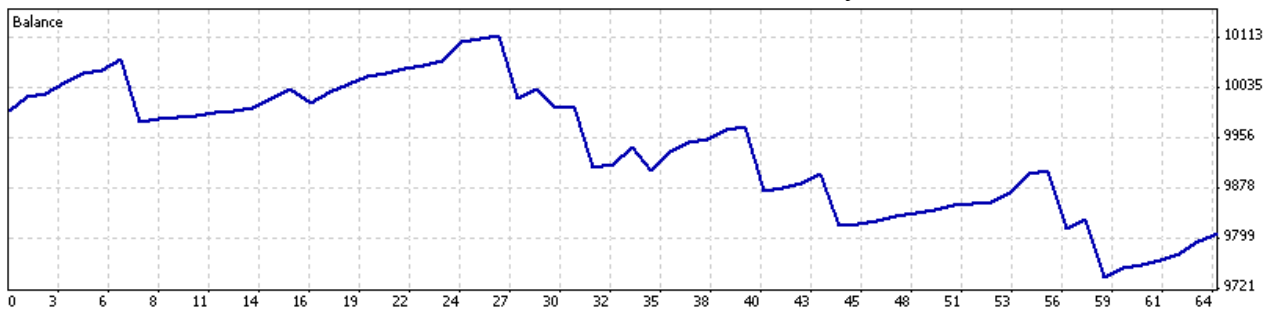

This EA trades EURGBP and EURCHF M15. It was released in October 2008 (before fapturbo) so it can't be an illegal clone. They use different algorithm. However the idea is very similar and the results are nearly the same. The price is \$399 — too high taking into account it is nearly the identical clone.

2. **StomperEA (Vendor iticsoftware)**

This is one more clone trading EURGBP during the asian session. However the algorithm is different. I did not test this EA personally so I will show 3rd party results here.

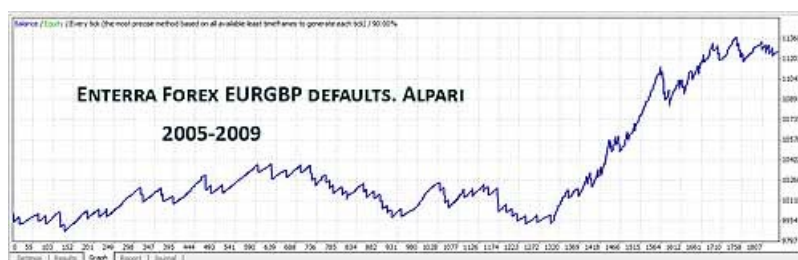

Stomper EA, 9 weeks result - Here is forward test graphics since 24 Nov 08 by automated-forex-review site. You can download [detailed statement](#) dated 30 January 2009

3. Enterra Forex Star

Enterra Forex Star EA is one more fapsturbo scalper clone - trading during the asian session. However it is not the 100% clone. They use the same main signal from RSI however they reworked some filters and optimized the EA for EURGBP, EURCHF, GBPCHF, USDCAD, EURCAD, USDCHF, CADCHF pairs.

Here is the Enterra Forex Star EA backtest on EURGBP for 2005-2009 :

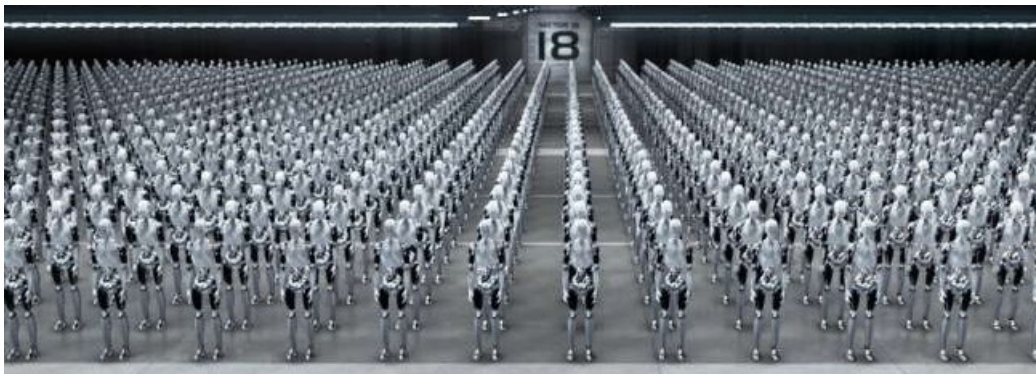

The price (\$750) is too high for the robot that is indeed nothing new. I assume you will have the same good profits and the same spread problems here.

How to find out if you are a victim of fapturbo clone:

1. The EA is trading same currency pairs: EURGBP, EURCHF, GBPCHF, USDCAD on M15.
2. EA is trading during the asian session (during night time in Europe, from 21-00 to 4-00)
3. EA has a scalping algorithm — gathering a large amount of small profits during the flat market.
4. Most of the clones are very expensive and have non-refund policy — so once you paid large amount of money you can't get it back.
5. Remember — there is only one official fapturbo site: www.Fapturbo.com — if someone is trying to sell you a copy on Ebay or other sites that means you are going to get a scam clone version and become a victim of the scam artists.

BEWARE!

**SCAM
ALERT**

by Mark Larsen,

Check out my website www.Forex-Systems-Reviews.com and Twitter <http://twitter.com/forexmark> to find out how to avoid Forex Scams and make profit trading with forex Robots.

Have a nice trading!
